VILLA STEPHANIE

SPA & WELLBEING

Having always been closely linked to the historical heritage of Baden-Baden, Brenners Park-Hotel & Spa, as a co-founder of the spa movement in Europe in the early 1980s, has deeply embedded the concept of *Salus per Aquam* in its DNA.

With the Villa Stéphanie Spa & Wellbeing, an entire establishment is now dedicated to the total spa experience. There are fifteen luxurious room units on five floors, including three imposing spa suites, with a private spa area, a generously-proportioned sauna landscape, a plunge pool, and stylish treatment rooms.

The impressive history, the wonderful natural surroundings in the spa town's green salon as well as the style and design – all of this contributes to creating an environment of rest and relaxation, with the atmosphere of a large private house, where the guest enjoys a customised experience.

The valuable overall concept is complemented by comprehensive therapies in the field of physiotherapy.

The Brenners Pool's Roman-style architecture follows the idea of tranquillity and symmetry, in addition to offering beautiful views of the park.

Temporomandibular joint Treatment

A malfunction of the temporomandibular joint can negatively impact the overall body statics, as the masticatory apparatus is closely linked to the head, spine, brain, and other organs. Teeth grinding, jaw clicking, pain in the jaw joints, head, ears or neck, tinnitus, migraines and many more are typical symptoms. Here, the focus is on examinations of the temporomandibular joint and the cervical spine or the overall body statics. The treatment is then carried out accordingly, using manual techniques.

Manual Lymphatic Drainage

Lymphatic drainage is a light, decongestive massage. It is mainly used to decongest the tissue and relieve pain after operations, cancer treatment, trauma or venous weakness. REIKI

The origin of the word “Reiki” lies in the Japanese language. It is composed of the syllables “Rei” (spirit) and “Ki” (life force). The combination of these terms describes the central aspect of Reiki, which is the channelling and transmission of positive, healing energy through the hands of the practitioner to the recipient. This traditional practice emphasizes the promotion of balance, relaxation, and health on physical, emotional, and spiritual levels.
