

TRAVEL CAN BE A FORCE FOR GOOD.

Travel promotes cross-cultural dialogue, the breaking down of mental barriers and the enhancement of international communication by opening doors and welcoming strangers into one another's 'homes'.

However, travel also has a considerable impact on the environment. Tourism contributes to the exploitation of natural resources in areas where they may already be scarce.

We at Oetker Collection take responsibility for our impact on the planet. For the past 5 years, we have been working tirelessly to establish a firm and coherent CSR (Corporate Social Responsibility) strategy at each of our 9 Masterpiece Hotels. Our mission is to ensure that the endearing places we call home are safeguarded from environmental degradation.

Our teams are "Host of Choice" because each member is proud to present their home country and share their cultural traditions with our guests.

At Oetker Collection, we are proud to create the framework to protect the meaningful connections we make possible.
